Re: California Prop 65 Response

Proposition 65, officially known as the Safe Drinking Water and Toxic Enforcement Act of 1986, is a California law to protect the state's drinking water sources from being contaminated with chemicals known to cause cancer, birth defects or other reproductive harm. The law requires businesses to provide warning to California residents about exposure to such chemicals.

Alro Steel purchases product from a variety of sources. As the distributor of material produced by another company, Alro is dependent upon them to certify compliance to the standards and regulations.

To the best of our knowledge, based upon information supplied by our suppliers, below is a list of the chemical(s) that may be included in the metal products we have supplied to you within the prior 12 months. If the product does not contain a chemical listed on the Prop 65 list, it will indicate "None".

Alro Steel certifies that it does not add any of the banned hazardous substances as a result of any process Alro conducts subsequent to purchase from the vendor but prior to sale to you.

Alro Steel believes this information to be reliable but does not and is not able to conduct independent testing to confirm this information.

Sincerely,

**Chris Schuler**  
Quality Manager
