REACH Compliance

Registration, Evaluation, Authorization and Restriction of Chemical (REACH) Substances of Very High Concern (SVHC) is a regulation of the European Union (EC 1907/2006). As of **June 14, 2023**, there are **235** chemicals on the SVHC list.

Substances on the SVHC Candidate List are not intentionally introduced at any time during the production of materials supplied by Plastics International. Incidental amounts, if present, would be below the threshold limit of 0.1% by weight.

Additional information about SVHC and the current candidate list of substances is available through the European Chemicals Agency website for REACH Guidance: <https://echa.europa.eu/candidate-list-table>.

Thank you for your interest in Plastics International's high-performance materials.

Regards,

Lance Jaeger
