Directive 2002/95/EC: Use Hazardous substances in electrical and electric equipment, RoHS,
RoHS 2 & RoHS 3 Directive 2002/96/EC: Waste Electrical and Electronic Equipment WEEE

Dear Sir or Madam,

On 13 February 2003 the Directive for Waste Electrical and Electronic Equipment (WEEE, 2002/96/EC of 27.01.2003) and the restriction of use of the certain hazardous substances in electrical and electronic equipment (RoHS, 2002/95/EU of 27.01.2003) had been published in the Official Journal of the European Union. Until 13 August 2004, the EU Member States had to implement both Directives into national Law. Since 01 July 2006 they have to be applied across Europe.

The recast Directive 2001/65/EU (RoHS) is legally valid from 03 January 2013.

Thyssenkrupp Materials NA, Copper and Brass Sales, supplies you with CU 145, SS 304, CU 360 WITH 6C EXEMPTION, AL 6061, CU 642, CU 693 Products.

Based on the information provided by our suppliers of the above mentioned products with any noted exceptions, we confirm that according to our present state of knowledge, the products supplied by us are compliant to the RoHS 3 EU Directive (2002/95/EC, recast 2011/65/EC RoHS 2 & EU 2015/863 *FOR THE RESTRICTION OF SPECIFIED HAZARDOUS SUBSTANCES*)

We would like to point out that this supplier declaration conforms to item 4.3.3 a in accordance with DIN EN 50581, but this confirmation can only be given for operations within our sphere of influence. Influences in the further handling of such material can cause the materials no longer comply with the requirements of the EU directives.

Substances, which are omnipresent, for example by a carryover in minute amounts, and can be detected by today's refined analysis methods, are not covered by this statement. The ubiquitous presence of traces of undesirable substances, however, can never fully excluded.

Sincerely,

Charles J Biegel

Charles J Biegel
