Restriction on Hazardous Substances

On behalf of Joseph T. Ryerson & Son, Inc. and all of its Subsidiaries, Business Units, Divisions, and Service Centers, this letter constitutes our formal certification that the list of products below labeled "Compliant," comply with the European RoHS Directive 2015/863/EU (RoHS 3) legislation. All of the regulated substances identified in these regulations are below the Maximum Concentration Levels. Any traces of cadmium that may be detected would be considered a contaminant in the Compliant Products and that level would be below 0.01% . Any traces of Mercury, Lead, Hexavalent Chromium, Polybrominated biphenyls (PBB), Polybrominated diphenyl ethers (PBDE), Bis (2-Ethylhexyl) phthalate (DEHP), Benzyl butyl phthalate (BBP), Dibutyl phthalate (DBP), and Diisobutyl phthalate (DIBP) found in the Compliant Products would be a negligible and certainly below 0.1% concentration by weight.
